#### ○授業の到達目標及びテーマ

This course aims to explore the East Asian economies using the theoretical framework of international economics. A particular focus will be placed on industrial policy, which includes trade and investment policy as a core element. Similarly, economic integration in East Asia (which include both Northeast and Southeast Asian countries) will be explored from the viewpoint of industrial development and economic growth. Students are expected to learn how international economic theories can be applied to explain the industrial development in East Asia, where rapid economic growth has been achieved by adopting outward-looking trade policy and enhancing regional integration.

#### ○授業の概要

The course presents and discusses the development of the East Asian economies. First, theories of industrial policy, as well as industry policies that were actually adopted by the East Asian economies after World War II, are reviewed as a matter of background. In addition, the relationship between industrial policy and institution is discussed because institutional capability, which is affected by cultural and historical background, is a critical factor for the effectiveness of industrial policy.

Second, economic integration in East Asia is discussed with reference to theories of trade, labor migration, and capital movement. Finally, the current development strategy, which focuses on participation and upgrading in global value chains (GVCs), is discussed with reference to East Asian experiences.

#### ○授業の方法

Lectures will be given in English, and in an interactive manner. Students are expected to prepare for each class by reading assigned items and be ready to actively participate.

The course assumes students' mastery of or familiarity with an intermediate level of microeconomics.

#### ○授業計画

\* The course plan and schedule may be modified/adjusted depending on the progress of the classes.

I. Theories of international trade and industrial policy (1<sup>st</sup>-2<sup>nd</sup> session)

II. Industrial policy in East Asia (3<sup>rd</sup> - 8<sup>th</sup> session)

1. Industrial policy in Northeast Asia

2. Industrial policy in Southeast Asia

III. Economic integration in East Asia (9<sup>th</sup>- 11<sup>th</sup> session)

1. Theories of economic integration

2. Economic integration in ASEAN and other regions

IV. Global value chains (GVCs) in East Asia (12<sup>th</sup> -14<sup>th</sup> session)

1. Theories of production fragmentation and value chains

2. GVC participation and upgrading in East Asia

V. Summary and discussions (15<sup>th</sup> session)
